Learning at St Edward's College

A coherent journey
from early learning
to global citizenship

St Edward's
COLLEGE
FOUNDED. 1929

St Edward's College offers a broad, balanced and carefully structured curriculum that supports students at every stage of their educational journey. The College offers excellent facilities for all core academic subjects such as various science laboratories, ICT labs, drama facilities as well as top-tier sports facilities, boarding rooms and a state of the art canteen. All these are available to the different age cohorts starting from Nursery to Sixth Form Level.

In the Early Years, learning is play-based and experiential, focusing on social, emotional and physical development alongside early literacy and numeracy. As students progress through Junior and Middle School, they are guided to develop strong foundations across core subjects while nurturing creativity, curiosity and independent thinking.

Senior School builds upon these foundations with increasing academic rigour and subject specialisation, preparing students for future pathways. Our IB Sixth Form provides an internationally recognised qualification that encourages critical thinking, research skills and global awareness.

Across all stages, we place strong emphasis on:

- Clear progression and continuity
- High academic standards supported by care and encouragement
- Language learning and communication skills
- Responsible and purposeful use of technology

Our curriculum is designed not only to meet academic benchmarks, but to develop confident learners who are adaptable, reflective and ready to engage with the world around them.
