IN FOR THE CHALLENGE

The start of the school year is always an exciting time: meeting old friends, making new ones and facing new challenges, in class and out of it.

This year we have put together a list of extracurricular activities that are exciting and challenging, each in its own way.

So, it is time to take a look at the options in this brochure and then decide where you will throw in your hat! Hint: don't take the easy way...that does not get you much satisfaction!

We have lots more activities in the offing. The college is planning great adventures but we will inform you later about these!

St Edward's
COLLEGE
FOUNDED. 1929

1. HOW TO CHOOSE

Extra-curricular activities are an opportunity on different levels.

- They offer you an activity you may not otherwise have the opportunity to pursue
- They are a safe space to try out something different
- They enable you to broaden your horizons, get new interests, make new friends

So, how do you choose? Consider these factors:

Am I artistic or sporty?
(HINT: Choose the opposite!)

Is there something I usually avoid?
(HINT: Go for it!)

Where can I make new friends?
(Hint: Making Friends is always good!)

What do I think is the most fun?
(Hint: Work hard but enjoy time off!)

2. PLEASE READ CAREFULLY

Important Information Regarding After-School Sessions

Application Process:

Applications for these sessions must be made directly with the organizing entity.

Session Cancellations:

In the event of unforeseen circumstances leading to the cancellation of a session, the organizing entity will reach out to you directly. Please ensure that you check your emails or other means of communication regularly for any updates.

Student Absences:

If your child is sick or has been picked up early, kindly inform the organizing entity as soon as possible so they are aware and do not expect your child for the session.

Open to Non-SEC Students:

These sessions are also open to non-SEC students.

Confirmation of Sessions:

A few days before the sessions are set to start, you will receive a confirmation. Please be on the lookout for this information.

Half-Day and Special Events:

On days when school ends with a half-day (1:00 PM), there will be no after-school activities. However, on days with events such as concerts, extra-curricular activities will still take place unless you are specifically informed otherwise.

St Edward's
COLLEGE
FOUNDED. 1929

Email Communication:

When sending emails to the organization, it is appreciated if you also copy the relevant head of section and your child's class teacher.

Minimum Enrolment Requirement:

Should the minimum required number of students for a session not be reached, refunds will be issued.

PHYSICAL DEVELOPMENT

Gymnathlon after-school sports programs at St Edward's Junior School

Dear Parents,

As we prepare for the upcoming scholastic year, **St Edward's Junior School** remains committed to providing outstanding opportunities that promote your child's health, confidence, and teamwork.

With this in mind, we are incredibly proud to announce that **Gymnathlon** will once again be partnering with us to offer their premier after-school sports program **starting this October 2026!**

Gymnathlon is a world-class, specialized training program for children aged **2.5 to 9 years** that masterfully combines athletic-gymnastic skill development with the joy of team play.

☀️ Why Parents and Kids Love Gymnathlon:

- **Precision Training:** Every single lesson is meticulously planned, ensuring your child follows a structured, progressive track to build physical literacy.
- **Stay Connected:** You won't miss a single milestone! Parents receive regular progress reports and photos from every session directly in their inbox.
- **The Perfect Foundation:** It builds versatility, sports motivation, and develops 12 key athletic skills that set children up for success in any sport they choose later in life.

📅 Registration

- **General Registration Opens:** Wednesday, 10th June 2026
- **How to Register:** Go to www.gymnathlon.com.mt to register online, and you will receive confirmation of payment and the schedule of sessions

🕒 Program Schedule & Pricing

- **Schedule:** every Wednesday from 14:00 to 15:00 from **7th October** excluding school and public holidays
- **Junior Programs:** €159 per term (2 terms of 14 weekly sessions)

📌 How to Secure Your Child's Spot

Gymnathlon courses are highly sought after, and capacity is strictly limited to ensure high-quality, individual attention for every child. We highly recommend setting a reminder for **10th June** to avoid disappointment. For more information you may contact us on **9976 0042** or support@gymnathlon.com.mt

GYMNATHLON

kids ♥ sport

Gymnathlon is a **sports program** for children based on the principles of **comprehensive physical development** and **strong emotional experience**.

Thanks to **well-thought-out methodology**, emphasis on **maximum playfulness**, and special features such as **game plans with motivational stickers** and a **traveling mascot**, children leave our training sessions enthusiastic and full of joy.

The mission of Gymnathlon is to build a **lifelong love of sports** in children.

The training content has been developed in collaboration with **experts from Charles University's Faculty of Physical Education and Sports** so that children can develop **key abilities and skills appropriate** for their age. For this purpose, Gymnathlon is structured into four consecutive courses:

Baby

2.5–4 years

First introduction to organized training for the youngest athletes, who, with parental support and the help of various tools, learn basic motor skills and gain independence.

Junior

4–6 years

A versatile sports course focused on building sports motivation and based on a diverse mix of athletic exercises, gymnastic exercises, and movement games, emphasizing the development of key motor skills.

Sportmix

6–9 years

A multisport course aimed at further developing versatility, team spirit, and cooperation through teaching the basics of various sports (basketball, gymnastics, tennis, athletics, volleyball, parkour).

Active

8–11 years

A fitness sports course focused on training physical abilities, technical skills, and reinforcing regular movement habits through fun circuit training and versatile movement games.

SUPPORTIVE AND NURTURING ENVIRONMENT

BRINGING SPORTS TO THE FOREFRONT

KG1-YEAR 6 €160 PER TERM

Class Duration: **One hour**

Days: **Term 1: 12th October 2026 - 14th December 2026**
Term 2: 11th January 2026 - 17th May 2026

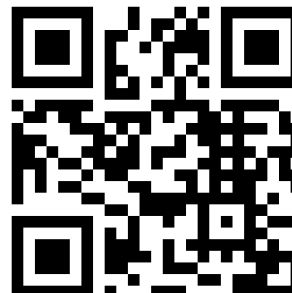

When: Every Monday

SportsKidz is a sports programme for kids. Children in KG1, KG2, Year 1 and Year 2 will attend for an hour and will be doing all kinds of physical activity, movement and games that include jumping, throwing and running. Our main aim is for them to have fun while improving their fundamental skills such as coordination, balance and strength.

Children in Year 3 to Year 6 will attend for an hour and will learn a basic introduction to different sports such as Handball, Volleyball, Basketball, Athletics, Tag Rugby, Football, Kwik Cricket as well as various team building activities. We firmly believe in being inclusive rather than competitive and we want our children to have fun as well as achieving certain life skills through sports.

robocoach

TRANSFORMING CURIOSITY INTO A LIFE-LONG LEARNING ATTITUDE

At robocoach, we bring science, technology, engineering, arts, and math to learners of all ages and abilities through fun, hands-on experiences. Our courses range from basic logic and programming to advanced robotics and technology, fostering creativity, critical thinking, and problem-solving.

Tailored to all skill levels, our constant hands-on sessions empower learners to build, code, and tackle STEAM challenges, while developing friendships and communication skills.

We expose students to various technologies, robotics and gadgets including but not limited to BeCrea Scottie Go!, Sphero, littleBits, Matatalab, Engino, robo wunderkind, and VEX Robotics, depending on specific course being followed.

We are not just preparing students for the future,
we're inspiring them to create it!

A collage of various educational robotics kits and projects. At the top left is a LEGO Mindstorms robot on a black and white grid. To its right is a Sphero robot in a clear plastic dome. Below the Sphero is a white, cube-shaped robot with large eyes. To the right of the white cube is a littleBits kit with a white base and colorful buttons. Below the littleBits is a custom-built robot made of colorful blocks. At the bottom center is a VEX Robotics competition field with various robots and structures. To the right of the VEX field is a white robot with a large orange wheel and a small orange robot next to it.

FOUNDED.1929

Robo Young Discoverers

A course for our youngest learners! Students start to build simple models in preparation for Robotics. They will develop an understanding that following a sequence of instructions or commands can help perform simple tasks.

Using easy to assemble models and compatible programs and applications they will enter the world of robotics with curiosity to discover more. The robotic gadgets used on the course will introduce the basic simple concepts of coding and programming to this young generation.

Venue: St. Edwards College, Birgu

Group: KG1, KG2

Day & Time: Tuesdays between 14:00 & 15:00

Fee: €140 (October to December 2026)

Robo Explorer

Students will step into the world of robotics and computational thinking through fun and interactive activities. Through this course, students will learn the basic concepts of programming and will start to understand that coding can provide solutions.

They will use easy to assemble models, compatible programs and applications to engage in different challenges to find solutions to tasks presented. Motivating every individual along the way.

Venue: St. Edwards College, Birgu

Group: Year 1 & 2

Day & Time: Thursdays between 14:00 & 15:00

Fee: €140 (October to December 2026)

St Edward's
COLLEGE
FOUNDED. 1929

Robo Developers

Experimenting through robotics and computational thinking, students will approach several fun and challenging tasks. During this course they will breakdown problems and tasks into simpler understandable solutions.

Using different robots, models and devices they will create a program to perform an action. They will experiment, investigate and discover the scientific notion therefore stimulating their curiosity further.

Venue: St. Edwards College, Birgu

Group: Year 3, 4, 5, 6

Day & Time: Tuesdays or Thursdays between 15:00 & 16:30 (includes a short break)

Fee: €140 (October to December 2026)

Robo Innovators

This course will allow students the time to experiment, investigate and discover the logical concepts of robotics and computational thinking.

They are at an age where they can face programmatic thinking techniques, problem solving solutions and embrace leadership skills while they design, construct and operate different robots, models and devices. Each concept is taught through fun and interactive activities.

Venue: St. Edwards College, Birgu

Group: Year 7,8,9

Day & Time: Tuesdays or Thursdays between 15:00 & 16:30 (includes a short break)

Fee: €140 (October to December 2026)

YOUNG ENGINEERS

Young Engineers is recognised by **Harvard University's Graduate School of Education** as a Global Education Innovation Initiative in STEM.

An award-winning educational organisation that offers academic enrichment programs to children across the globe, operating in over 60 countries.

Day: Tuesday (Both groups)

Total Classes: 9

Term fee: €126

Year 1 and 2

Time: 2:00PM - 3:00PM

Class duration: 1hr

Year 3, 4, 5 and 6

Time: 3:15PM - 4:45PM

Class duration: 1.5 hrs

officially recognized by

St Edward's
COLLEGE
FOUNDED. 1929

Young Engineers is an internationally recognised STEM enrichment programme that introduces children to the exciting world of engineering through hands-on building, creativity, and problem-solving. The programme has been recognised by the Harvard Graduate School of Education's Global Education Innovation Initiative (GEII) and has also received recognition from the European Commission for its contribution to STEM education and future skills development.

Our lessons combine engineering, science, mathematics, and technology in a fun and engaging environment where children learn by building working models, experimenting with mechanical systems, and solving real-world challenges.

What children will learn:

- **Engineering and mechanical concepts through hands-on model building**
- **Physics principles such as gears, levers, pulleys, motion, force, and energy transfer.**
- **Critical thinking and problem-solving skills.**
- **Mathematical and logical reasoning through practical applications.**
- **Creativity, teamwork, communication, and perseverance.**
- **Fine motor skills, concentration, and confidence.**
